TRADEWINDS

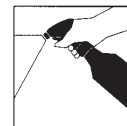

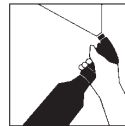

DEODORIZING SPACE SPRAY

Professional Recommendations

- Spray up, in area with air movement for peak effectiveness
- Exercise caution near finished wood, coated metals
- Follow directions—do not overuse

Specifications

Appearance	Aqua liquid
Odor	Fresh
Density (lbs/gal)(±0.1 @20°C)	8.11
pH (conc.)(±0.5 @20°C)	9.4
Refractive index (± .0020 @20°C)	1.3667
Flashpoint	53.0
USDA rating	C-1
Stability (40°-120°F)	Stable
Freeze/thaw stability	OK, 3 cycles
Shelf life (closed containers, 40°-120°F)	1 year minimum

Use only through PDQ dispenser for proper dilution rate. 1/2 gallon microconcentrate makes 38 RTU quarts.

Use **Tradewinds** wherever unwanted odors originate. When deodorizing carpets, draperies, upholstery or other fabrics, pretest an out-of-the-way spot for colorfastness. Do not proceed until you are sure the fabric is colorfast.

To eliminate airborne odors such as cigarette or cigar smoke, or stale, musty odors, spray **Tradewinds** upward in a fine mist—about 3 sprays in a 10' x 10' area. If desired, spray directly on to surfaces that retain unwanted odors.

To eliminate odors at their source, spray **Tradewinds** directly on odor sources such as garbage pails, ashtrays, diaper pails, pet areas and the like.

Use **Tradewinds** full strength; do not dilute.

Available in size:
1/2 gallon containers.

Read all directions and cautions
prior to beginning work.
