

**NIGHT SHOCKER  
MICROBIAL POWDER FLOOR WASH**

- Improves Traction and Reduces Slips & Falls
- Cleans & Brightens Dirty Grout Lines
- Reduces Scrubbing
- pH Neutral
- Eliminates "Foul Odor" Floors
- Eliminates "Urine Odor"
- Helps Drainage Systems
- While not a pesticide, the microbial action helps eliminate the nesting area of drain flies
- WHMIS/OSHA exempt
- Evaluated and accepted by The Canadian Food Inspection Agency (CFIA)

**How does it work?**

Safe and sanitary floor restoration. Reduces slipperiness and improves cleanliness of floors by employing a microbial powder technology that stems from a patented formula. Contains a cost effective natural substrate from mother nature, which acts as a microbial carrier and contains a strong natural surfactant. The unique characteristics of this substrate allows you to clean almost any surface or treat any waste water environment, while providing for remediation of organic materials. Non-foaming. Can be applied with foaming trigger head/gun/ device, or a misting application. Through repetitive applications more and more microbes are released into the cracks of a surface of the environment, allowing for constant digestion of organic materials.

- People Friendly
- Wildlife Friendly
- Environmentally Friendly
- All Natural Solution

The brown/tea colour solution may not look great - but it works.

**Applications:**

- For use in Institutional and Food Processing Environments
- Restaurant Floors (Back and Front)
- Bathroom Floors
- Grease Traps and Lines
- Any where in food service or hospitality areas where you have unsightly grout, slippery floors or malodor from floors.

**DIRECTIONS:**

**General:**

1. Before use, thoroughly clean the container (e.g. pails, mop buckets or spray bottles) while always using new-cleaning supplies such as a mop head or towel, or items dedicated to this product.
2. Add Night Shocker to the container, fill with cool/cold tap water and stir well.
3. Never add bleach to the product or other cleaning agents.
4. Do not store in food processing areas or food storage areas.

**For Initial Shock Treatment/Cleaning:**

1. Add one & one-half (1 1/2) scoops of product per gallon of solution desired into empty mop bucket.
2. Add cool/cold water to the mop bucket. Stir/mix.
3. Flood mop floor.
4. Allow 15 minute (or more if possible) dwell time.
5. Scrub floor (swing machine with pads, or roller brush machine, etc.)
6. Vacuum solution with a wet vac or auto scrubber.

**For Heavily Soiled Floors:**

1. Add one (1) scoop of product per gallon of solution desired into empty mop bucket or auto scrubber.
2. Add cool/cold water. Stir/mix.
3. Flood mop floor or if using an auto scrubber, scrub but do not pick up solution, and leave on for the night.
4. In the morning, damp mop or auto scrub floor with ES84 Neutral Floor Cleaner.

**For Regular Cleaning:**

1. Add one-half (1/2) scoop of product per gallon of solution desired into empty mop bucket or auto scrubber.
2. Follow same procedures as for Heavily Soiled Floors.

**SIZES:**

0.680kg (1.5 lbs) per tub; 6 tubs per case
